Folks,

Here is the draft sampling plan for additional ground water samples in the Southern Impoundment. I would appreciate your early review of this.

Thanks,

Gary Miller

Subject: Draft Groundwater SAP Addendum - San Jacinto River Waste Pits Superfund Site

Gary – On behalf of International Paper, Company (IPC), we are submitting the attached draft Groundwater Sampling and Analysis Plan Addendum 2 (SAP Addendum) to address the additional investigation requested by USEPA in regards to groundwater in the vicinity of Soil Investigation Area 4. It continues to be IPC's position that only COIs listed in Table 5 of the Sediment SAP (Integral and Anchor QEA 2010b) should be analyzed in additional soil and groundwater samples taken in the area of investigation south of I-10, because only these COIs are potentially attributable to any disposal of paper mill waste in the 1960s. Analysis of soil and groundwater for a full suite of VOCs and SVOCs, and analysis of soil and sediment samples for total PCBs, is unwarranted; however, as requested by USEPA, analysis of the samples for the full suite of VOCs and SVOCs and for total PCBs is provided for in the attached SAP Addendum.

Please don't hesitate to contact me if you would like to discuss anything during your review of this document. Hard copies are being sent by overnight delivery. Please forward the attached PDF as appropriate.

Thank you,
David
